INDEX TO SUBJECTS

A

Abstracts of papers presented at the Twenty-Seventh Annual Meeting of the Society of General Physiologists, 647

Acetylcholine, role in nerve-muscle interaction in vitro, 255

Acid, amino, transport, inhibition in rabbit intestine by *p*-chloromercuriphenyl sulfonic acid, 131

—, *p*-chloromercuriphenyl sulfonic, inhibition of amino acid transport in rabbit intestine by, 131

Adaptation, dark, and visual pigment regeneration in human cones, 430

—, local, and phototropism in *Phycomyces* sporangiophores, 157

Adenosine triphosphate breakdown, method for determining free energy of. On reversibility of sodium pump in dialyzed squid axons, 643

Albizzia, protein synthesis during endogenous rhythmic leaflet movement, 707

Amino acid transport, inhibition in rabbit intestine by *p*-chloromercuriphenyl sulfonic acid, 131

Aplysia neuron, giant, light response of, 239

Attractant concentrations, range for bacterial chemotaxis and the threshold and size of response over this range. Weber law and related phenomena, 203

Axons, dialyzed squid, reversibility of sodium pump in. Method for determining free energy of adenosine triphosphate breakdown, 643

—, internally dialyzed squid giant, calcium efflux from, 575

—, squid, perfused with Pronase, destruction of sodium conductance inactivation, 375

B

Bacterial chemotaxis, range of attractant concentrations and threshold and size of response over this range. Weber law and related phenomena, 203

Barnacle photoreceptor, antagonistic components of late receptor potential arising from different stages of pigment process, 105

Barnacle photoreceptor, visual pigment, early receptor potential evidence for existence of two thermally stable states in, 87

Binding, intracellular binding and release in frog heart, 693

Blood cells, red. *See* Erythrocytes.

Burst-generating mechanism in cardiac ganglion of lobster, relaxation oscillator description, 473

C

Calcium binding and release in frog heart, intracellular, 693

— efflux from internally dialyzed squid giant axons, 575

— ion, stopped-flow measurements of uptake by cardiac mitochondria, mechanisms for intracellular calcium regulation in heart, 523

— regulation in heart, intracellular mechanisms, stopped-flow measurements of Ca^{++} uptake by cardiac mitochondria, 618

Cardiac ganglion of the lobster, *Homarus americanus*, functional organization, 448

— ganglion, lobster, relaxation oscillator description of burst-generating mechanism, 473

— mitochondria, stopped-flow measurements of Ca^{++} uptake, mechanisms for intracellular calcium regulation in heart, 756

— muscle of turtle, mechanical and electrical oscillations, 523

Cell, hair, interactions in statocyst of *Hermissenda*, 618

—, intracellular calcium binding and release in frog heart, 693

—, intracellular calcium regulation in heart, stopped-flow measurements of Ca^{++} uptake by cardiac mitochondria 756

Cells, embryonic chick heart, tetrodotoxin desensitization in aggregates of, 286

—, flounder renal, sugar transport across peritubular face, 169

—, L (fibroblasts) in cell culture, transmission of an active electrical response, 25

Cells, red blood. *See* Erythrocytes.
—, violet and yellow receptor, localization in the crayfish retinula, 355
Chemotaxis, bacterial, range of attractant concentrations and threshold and size of response over this range. Weber law and related phenomena, 203
p-Chloromercuriphenyl sulfonic acid, inhibition of amino acid transport in rabbit intestine by, 131
Conductance, anion, of frog muscle membranes: one channel, two kinds of pH dependence, 324
—, sodium inactivation, destruction in squid axons perfused with Pronase, 375
Cones, human, dark adaptation and visual pigment regeneration, 430
Contraction, energetics of, in phasic and tonic skeletal muscles of the chicken, 303
Contractions, tetanic, and twitches, energetics of shortening muscles, force-determined shortening heat, 677
—, tetanic, and twitches, energetics of shortening muscles, reinvestigation of Hill's concept of shortening heat, 663

D

Dark adaptation and visual pigment regeneration in human cones, 430
— recovery, rapid, invertebrate early receptor potential, 77
Desensitization, tetrodotoxin, in aggregates of embryonic chick heart cells, 286
Dose-response curve at motor endplate, linear, 58

E

Early receptor potential evidence for existence of two thermally stable states in barnacle visual pigment, 87
— receptor potential, invertebrate, rapid dark recovery, 77
Electrolyte secretion by in vitro rabbit pancreas, micropuncture investigation of whole tissue mechanism, 407
Embryonic chick heart cells, tetrodotoxin desensitization in aggregates of, 286
Endogenous rhythmic leaflet movement in *Albizzia*, protein synthesis during, 707
Endplate, motor, linear dose-response curve, 58
Erythrocyte membrane, human, patterns of nonelectrolyte permeability, 714
Erythrocytes, dog. Adjustment of salt and water content in vitro, 147
Eye, *Limulus*, thermal sensitivity of lateral inhibition, 392

F

Fibers, frog muscle, effect of bathing solution tonicity on resting tension, 737
—, skinned frog muscle, tension in solutions of varying ionic strength and neutral salt composition, 550
Fibroblasts (L cells) in cell culture, transmission of an active electrical response, 25
Force-determined shortening heat, energetics of shortening muscles in twitches and tetanic contractions, 677

G

Ganglion, lobster cardiac, functional organization, 448
—, lobster cardiac, relaxation oscillator description of burst-generating mechanism, 473
Glomerular wall, measurement of permeability of biological membranes, 489

H

Hair cell interactions in statocyst of *Hermissenda*, 618
Heart cells, embryonic chick, tetrodotoxin desensitization in aggregates of, 286
—, frog, intracellular calcium binding and release, 693
—, mechanisms for intracellular calcium regulation, stopped-flow measurements of Ca^{++} uptake by cardiac mitochondria, 756
Heat, force-determined shortening, energetics of shortening muscles in twitches and tetanic contractions, 677
—, initial production in isometric frog muscle at 15°C, 271
—, shortening, reinvestigation of Hill's concept, energetics of shortening muscles in twitches and tetanic contractions, 663
Hermissenda, hair cell interactions in statocyst of, 618
—, intersensory interactions, 185
Homarus americanus, functional organization of the cardiac ganglion, 448
—, relaxation oscillator description of the burst-generating mechanism in the cardiac ganglion, 473

Hydrogen ion dependence, two kinds, one channel: anion conductance of frog muscle membranes, 324

I

Inhibition of amino acid transport in rabbit intestine by *p*-chloromercuriphenyl sulfonic acid, 131
—, lateral, thermal sensitivity in *Limulus* eye, 392
— of sodium currents in myelinated nerve by quaternary derivatives of lidocaine, 37
Intersensory interactions in *Hermissenda*, 185
Intestine, rabbit, inhibition of amino acid transport by *p*-chloromercuriphenyl sulfonic acid, 131

L

L cells (fibroblasts) in cell culture, transmission of an active electrical response, 25
Late receptor potential, antagonistic components in barnacle photoreceptor arising from different stages of pigment process, 105
Lateral inhibition in *Limulus* eye, thermal sensitivity, 392
Lidocaine, quaternary derivatives, inhibition of sodium currents in myelinated nerve, 37
Light growth response of *Phycomyces*, 590
— response of giant *Aplysia* neuron, 239
—, visible-, suppression of afterpotential in *Limulus* UV photoreceptors, antagonistic process as source of, 787
Limulus eye, thermal sensitivity of lateral inhibition, 392
— UV photoreceptors, antagonistic process as source of visible-light suppression of afterpotential in, 787
Lobster, cardiac ganglion, functional organization, 448
— cardiac ganglion, relaxation oscillator description of burst-generating mechanism, 473

M

Man, dark adaptation and visual pigment regeneration in cones, 430
—, patterns of nonelectrolyte permeability in red cell membrane, 714
Membrane, human red cell, patterns of nonelectrolyte permeability, 714
Membranes, biological, measurement of permeability, application to glomerular wall, 489
—, frog muscle, anion conductance: one channel, two kinds of pH dependence, 324
Micropuncture investigation of whole tissue mechanism of electrolyte secretion by in vitro rabbit pancreas, 407
Mitochondria, cardiac, stopped-flow measurements of Ca^{++} uptake, mechanisms for intracellular calcium regulation in heart, 756
Motor endplate, linear dose-response curve, 58
Muscle fibers, frog, effect of bathing solution tonicity on resting tension, 737
— fibers, skinned frog, tension in solutions of varying ionic strength and neutral salt composition, 550
—, isometric frog, initial heat production at 15°C, 271
— membranes, frog, anion conductance: one channel, two kinds of pH dependence, 324
—, turtle cardiac, mechanical and electrical oscillations, 523
Muscle-nerve interaction in vitro. Role of acetylcholine, 255
Muscles, phasic and tonic skeletal of the chicken, energetics of contraction, 303
— in twitches and tetanic contractions, energetics of shortening, force-determined shortening heat, 677
— in twitches and tetanic contractions, energetics of shortening, reinvestigation of Hill's concept of the shortening heat, 663
Myelinated nerve, inhibition of sodium currents by quaternary derivatives of lidocaine, 37

N

Nerve, myelinated, inhibition of sodium currents by quaternary derivatives of lidocaine, 37
Nerve-muscle interaction in vitro. Role of acetylcholine, 255
Neuromuscular junction, spider, quantal nature of synaptic transmission, 224
Neuron, giant *Aplysia*, light response of, 239

Nitella clavata, potassium permeability in depolarized state, 535

O

Oscillations, mechanical and electrical, in cardiac muscle of turtle, 523
Oscillator description, relaxation, of burst-generating mechanism in cardiac ganglion of lobster, 473

P

Pancreas, in vitro rabbit, micropuncture investigation of whole tissue mechanism of whole tissue mechanism of electrolyte secretion, 407
Peritubular face of renal cells, flounder, sugar transport across, 169
Permeability of biological membranes, measurement, application to glomerular wall, 489
—, nonelectrolyte, patterns in human red cell membrane, 714
—, potassium, of *Nitella clavata* in the depolarized state, 535
Phasic and tonic skeletal muscles of the chicken, energetics of contraction, 303
Phosphate, adenosine tri-, method for determining free energy of. On reversibility of sodium pump in dialyzed squid axons, 643
Photoreceptor, barnacle, antagonistic components of late receptor potential arising from different stages of pigment process, 105
—, *Limulus* UV, antagonistic process as source of visible-light suppression of afterpotential in, 787
Phototropism and local adaptation in *Phycomyces* sporangiophores, 157
Phycomyces, light growth response, 590
— sporangiophores, phototropism and local adaptation in, 157
Pigment, barnacle visual, early receptor potential evidence for existence of two thermally stable states in, 87
— process, stages, antagonistic components of the late receptor potential in barnacle photoreceptor, 105
—, visual, regeneration and dark adaptation in human cones, 430
Potassium permeability of *Nitella clavata* in the depolarized state, 535
Pronase, destruction of sodium conductance inactivation in squid axons perfused with, 375
Protein synthesis during endogenous rhythmic leaflet movement in *Albizzia*, 707
Pump, sodium, reversibility in dialyzed squid axons, method for determining free energy of adenosine triphosphate breakdown, 643

Q

Quantal nature of synaptic transmission at neuromuscular junction of spider, 224

R

Red blood cells. *See* Erythrocytes.
Regeneration, visual pigment, and dark adaptation in human cones, 430
Relaxation oscillator description of burst-generating mechanism in cardiac ganglion of lobster, 473
Renal cells, flounder, sugar transport across peritubular face, 169
Resting tension in frog muscle fibers, effect of bathing solution tonicity, 737
Reticulum, sarcoplasmic, fragments in vitro, reexamination of electrical stimulation, 773
Retinula, crayfish, localization of violet and yellow receptor cells, 355
Rhodopsin, orientation of intermediates in bleaching of shear-oriented, 509

S

Salt and water content in vitro, adjustment of, dog red blood cells, 147
Sarcoplasmic reticulum fragments in vitro, reexamination of electrical stimulation, 773
Sensitivity, thermal, of lateral inhibition in *Limulus* eye, 392
Shear-oriented rhodopsin, orientation of intermediates in bleaching of, 509
Skeletal muscles of the chicken, phasic and tonic, energetics of contraction, 303
Skin, frog, response to steady-state voltage clamping. The active pathway, 1
Sodium conductance inactivation, destruction in squid axons perfused with Pronase, 375
— currents, inhibition in myelinated nerve by quaternary derivatives of lidocaine, 37
— pump, reversibility in dialyzed squid

axons, method for determining free energy of adenosine triphosphate breakdown, 643
Sporangiophores, *Phycomyces*, phototropism and local adaptation in, 157
Statocyst of *Hermissenda*, hair cell interactions, 618
Steady-state voltage clamping, response of frog skin. The active pathway, 1
Sugar transport across peritubular face of renal cells of flounder, 169
Sulfonic acid, *p*-chloromercuriphenyl, inhibition of amino acid transport in rabbit intestine by, 131
Synaptic transmission, quantal nature at the neuromuscular junction of spider, 224
Synthesis, protein, during endogenous rhythmic leaflet movement in *Albizzia*, 707

T

Tension in skinned frog muscle fibers in solutions of varying ionic strength and neutral salt composition, 550
Tetanic contractions and twitches, energetics of shortening muscles, force-determined shortening heat, 677
— contractions and twitches, energetics of shortening muscles, reinvestigation of Hill's concept of shortening heat, 663
Tetrodotoxin desensitization in aggregates of embryonic chick heart cells, 286
Tissue, whole, mechanism of electrolyte secretion by in vitro rabbit pancreas, micropuncture investigation, 407
Tonic and phasic skeletal muscles of the chicken, energetics of contraction, 303
Tonicity, effect of bathing solution on resting tension in frog muscle fibers, 737
Triphosphate, adenosine, breakdown, method for determining free energy of. On reversibility of sodium pump in dialyzed squid axons, 643
Twitches and tetanic contractions, energetics of shortening muscle, force-determined shortening heat, 677
— and tetanic contractions, energetics of shortening muscles, reinvestigation of Hill's concept of shortening heat, 663

V

Visual pigment, barnacle, early receptor potential evidence for existence of two thermally stable states in, 87
— pigment regeneration and dark adaptation in human cones, 430

W

Water and salt content in vitro, adjustment of, dog red blood cells, 147
Weber law and related phenomena, range of attractant concentrations for bacterial chemotaxis and threshold and size of response over this range, 203

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of General Physiology. Published monthly at 1230 York Ave; New York 10021 by The Rockefeller University Press, New York 10021. Editor: Paul F. Cranefield, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 3089; sales through dealers, street vendors, counter sales, 0; mail subscriptions 2397. Total paid circulation, 2326; free distribution 71; office use, left-over, unaccounted, spoiled 692; net press run, 3089. Single issue nearest filing date Sept. 1973. (Signed W. A. Bayless, Director).

THE JOURNAL OF GENERAL PHYSIOLOGY

FOUNDED BY JACQUES LOEB

Honorary Editors

L. R. BLINKS
DETLEV W. BRONK
ALFRED E. MIRSKY
JOHN H. NORTHROP

Editor

PAUL F. CRANEFIELD

Editorial Board

VINCENT ALLFREY
FRANCIS D. CARLSON
C. M. CONNELLY
PETER F. CURRAN
ROY P. FORSTER
BERTIL HILLE
PAUL HOROWICZ
WILLIAM P. HURLBUT
DAVID MAUZERALL
L. J. MULLINS
RICHARD J. PODOLSKY
FLOYD RATLIFF
ASER ROTHSTEIN
STANLEY G. SCHULTZ
A. K. SOLOMON
ANDREW G. SZENT-GYORGYI
ROGER C. THOMAS
D. C. TOSTESON
ANNEMARIE WEBER
VICTOR J. WILSON

VOLUME 62 · THE JOURNAL OF GENERAL PHYSIOLOGY IS THE OFFICIAL ORGAN OF THE SOCIETY OF GENERAL PHYSIOLOGISTS AND IS EDITED IN COOPERATION WITH THE SOCIETY
THE ROCKEFELLER UNIVERSITY PRESS · NEW YORK 1973

CONTENTS OF VOLUME 62

NUMBER 1, JULY, 1973

1 LAZARO J. MANDEL and PETER F. CURRAN. Response of the frog skin to steady-state voltage clamping. II. The active pathway

25 PHILLIP G. NELSON and JOHN H. PEACOCK. Transmission of an active electrical response between fibroblasts (L cells) in cell culture

37 GARY R. STRICHARTZ. The inhibition of sodium currents in myelinated nerve by quaternary derivatives of lidocaine

58 LESLEY HARRINGTON. A linear dose-response curve at the motor endplate

77 PETER HILLMAN, F. A. DODGE, S. HOCHSTEIN, B. W. KNIGHT, and B. MINKE. Rapid dark recovery of the invertebrate early receptor potential

87 B. MINKE, S. HOCHSTEIN, and P. HILLMAN. Early receptor potential evidence for the existence of two thermally stable states in the barnacle visual pigment

105 S. HOCHSTEIN, B. MINKE, and P. HILLMAN. Antagonistic components of the late receptor potential in the barnacle photoreceptor arising from different stages of the pigment process

NUMBER 2, AUGUST, 1973

131 JOHN F. SCHAEFFER, ROBERT L. PRESTON, and PETER F. CURRAN. Inhibition of amino acid transport in rabbit intestine by *p*-chloromercuriphenyl sulfonic acid

147 JOHN C. PARKER. Dog red blood cells. Adjustment of salt and water content in vitro

157 DAVID S. DENNISON and RICHARD P. BOZOF. Phototropism and local adaptation in *Phycomyces* sporangiophores

169 ARNOST KLEINZELLER and ELIZABETH M. MCAVOY. Sugar transport across the peritubular face of renal cells of the flounder

185 DANIEL L. ALKON. Intersensory interactions in *Hermissenda*

203 ROBERT MESIBOV, GEORGE W. ORDAL, and JULIUS ADLER. The range of attractant concentrations for bacterial chemotaxis and the threshold and size of response over this range. Weber law and related phenomena

224 H. R. BRENNER and W. RATHMAYER. The quantal nature of synaptic transmission at the neuromuscular junction of a spider

NUMBER 3, SEPTEMBER, 1973

239 ARTHUR M. BROWN and H. MACK BROWN. Light response of a giant *Aplysia* neuron

255 J. H. STEINBACH, A. J. HARRIS, J. PATRICK, D. SCHUBERT, and S. HEINEMANN. Nerve-muscle interaction in vitro. Role of acetylcholine

271 ALLAN FRASER and FRANCIS D. CARLSON. Initial heat production in isometric frog muscle at 15°C

286 TERENCE F. MCDONALD, HOWARD G. SACHS, and ROBERT L. DEHAAN. Tetrodotoxin desensitization in aggregates of embryonic chick heart cells

303 JACK A. RALL and B. A. SCHOTTELIUS. Energetics of contraction in phasic and tonic skeletal muscles of the chicken

324 J. W. WOODBURY and P. R. MILES Anion conductance of frog muscle membranes: one channel, two kinds of pH dependence

NUMBER 4, OCTOBER, 1973

355 EISUKE EGUCHI, TALBOT H. WATERMAN, and JIRO AKIYAMA. Localization of the violet and yellow receptor cells in the crayfish retinula

375 CLAY M. ARMSTRONG, FRANCISCO BEZANILLA, and EDUARDO ROJAS. Destruction of sodium conductance inactivation in squid axons perfused with Pronase

392 ALAN R. ADOLPH. Thermal sensitivity of lateral inhibition in *Limulus* eye

407 C. H. SWANSON and A. K. SOLOMON. A micropuncture investigation of the whole tissue mechanism of electrolyte secretion by the in vitro rabbit pancreas

430 M. HOLLINS and M. ALPERN. Dark adaptation and visual pigment regeneration in human cones

448 EARL MAYERI. Functional organization of the cardiac ganglion of the lobster, *Homarus americanus*

473 EARL MAYERI. A relaxation oscillator description of the burst-generating mechanism in the cardiac ganglion of the lobster, *Homarus americanus*

489 A. VERNIORY, R. DU BOIS, P. DECOODT, J. P. GASSEE, AND P. P. LAMBERT. Measurement of the permeability of biological membranes. Application to the glomerular wall

NUMBER 5, NOVEMBER, 1973

509 WOODRING E. WRIGHT, PAUL K. BROWN, and GEORGE WALD. Orientation of intermediates in the bleaching of shear-oriented rhodopsin

523 EMIL BOZLER and J. F. DELAHAYES. Mechanical and electrical oscillations in cardiac muscle of the turtle

535 HIROSHI KITASATO. Potassium permeability of *Nitella clavata* in the depolarized state

550 A. M. GORDON, R. E. GODT, S. K. B. DONALDSON, and C. E. HARRIS. Tension in skinned frog muscle fibers in solutions of varying ionic strength and neutral salt composition

575 REINALDO DIPOLO. Calcium efflux from internally dialyzed squid giant axons

590 K. W. FOSTER and E. D. LIPSON. The light growth response of *Phycomyces*

618 PETER B. DETWILER AND DANIEL L. ALKON. Hair cell interactions in the statocyst of *Hermissenda*

643 LETTER TO THE EDITOR

J. BRIAN CHAPMAN. On the reversibility of the sodium pump in dialyzed

squid axons. A method for determining the free energy of adenosine triphosphate breakdown?

647 Abstracts of Papers Presented at the Twenty-Seventh Annual Meeting of the Society of General Physiologists

NUMBER 6, DECEMBER, 1973

663 Earl Homsher and Jack A. Rall. Energetics of shortening muscles in twitches and tetanic contractions. I. A reinvestigation of Hill's concept of the shortening heat

677 Earl Homsher, W. F. H. M. Mommaerts, and N. V. Ricchiuti. Energetics of shortening muscles in twitches and tetanic contractions. II. Force-determined shortening heat

693 Saul Winegrad. Intracellular calcium binding and release in frog heart

707 Philip B. Applewhite, Ruth L. Satter, and Arthur W. Galston. Protein synthesis during endogenous rhythmic leaflet movement in *Albizzia*

714 P. Naccache and R. I. Sha'afi. Patterns of nonelectrolyte permeability in human red blood cell membrane

737 J. Lännergren and J. Noth. The effect of bathing solution tonicity on resting tension in frog muscle fibers

756 Antonio Scarpa and Pierpaolo Graziotti. Mechanisms for intracellular calcium regulation in heart. I. Stopped-flow measurements of Ca^{++} uptake by cardiac mitochondria

773 H. Miyamoto and M. Kasai. Reexamination of electrical stimulation on sarcoplasmic reticulum fragments in vitro

787 Letter to the Editor

B. Minke, S. Hochstein, and P. Hillman. Antagonistic process as source of visible-light suppression of afterpotential in *Limulus* UV photoreceptors

792 Indexes to Volume 62
